Resources available for the study programme implementation

<p>Human resources</p>	<p>Main structure of teaching staff of the educational program consists of the teaching staff of the Department of Finance, Banking and Insurance ERI BT «UAB». Also, the teaching staff of the ERI BT «UAB» is involved in the teaching of certain courses according to their competence and experience.</p> <p>Lecturers of the program are active and recognized scholars with published works in domestic and foreign scientific literature, have the appropriate professional competence and experience in research and teaching activities.</p> <p>The practice-oriented nature of the educational program involves the participation of practitioners in the program field, as well as the involvement of high-level competent experts in teaching, which enhances the synergy of theoretical and practical training.</p> <p>The head of the project team and the teaching staff, which provides the implementation of the educational program, meets the requirements specified by the Licensing conditions for the educational activities provided by educational institutions.</p>
<p>Material technical support and</p>	<p>The educational process of the program takes place in auditoriums and Training Bank, equipped with multimedia devices and necessary technical means. Three portable projectors with laptops, an information stand and a projection screen are used in the educational work of the program. Training sessions are held in two computer classes equipped with a multimedia projector. The Training Bank is equipped with 20 computers with Microsoft licensed software, an interactive whiteboard, a printer, an audio system and an interactive tablet. The other class is equipped with 16 computers installed Microsoft licensed software, and projector and motorized screen.</p> <p>Microsoft's and SCARB software packages are also used in the training.</p> <p>In the learning process, the Google product program is actively being used Classroom, which allows you to organize and control the non- auditing work of students in electronic form. Students receive homework assignments remotely and send them to the teacher, receive advice and evaluation. The advantages of this form are the presence of a distance dialogue between the teacher and the student as well as the possibility of downloading the teacher additional materials that extend the subject discipline (video materials, textbooks, methodological materials, etc.). SOCRATIVE product is widely used in testing knowledge during lectures and practical classes using mobile devices by students. This allows to determine not only the level of knowledge, but also the range of issues that need to be reconsidered by the teacher to cover certain aspects of the material</p>
<p>Information, learning and methodic provisions</p>	<p>Students of this educational program and teachers can use the library-information buildings, the interuniversity scientific library, separate libraries and library points at the educational and research structural divisions of the university. There are also virtual electronic reading rooms. Information resources of the SSU Library for the educational program are formed in accordance with the subject area and current trends of scientific research in this field. Students can access all printed publications in various languages, including monographs, tutorials, textbooks, dictionaries, etc. However, they can browse the literature using traditional library search tools or use Internet access and databases.</p> <p>Access to all library databases is provided through University's internal network. Students also use methodological material prepared by teachers: textbooks, lectures' presentations, lecture notes, methodical instructions for practical, laboratory, seminar, individual tasks, etc. Methodical material can be provided both in printed form and in electronic form.</p>

	<p>For remote access to teaching materials, the OCW platform of the SSU has been developed (the platform allows you to combine materials from distance courses, the Lector`ED designer with the possibility of teamwork on electronic learning resources, materials of the library's electronic catalog, repository and links to external educational resources).</p> <p>The methodical material is periodically updated and adapted to the goals of the educational program</p>
Academic mobility	
Internal academic mobility	Not provided
International Academic Mobility	There is an opportunity to study according to the mobility semester program based on a bilateral agreement between Sumy State University and the Banking Institute «High School» (Czech Republic)
